Learning Objectives: At the end of
this program participants should be
able to:

The mechanics of lower venous disorders

- Summarize normal venous function and how alterations may produce symptoms and/or disease
- Propose how mechanical interventions (graduated compression stockings) assist in managing venous disorders.
- Outline patient populations that may benefit from mechanical therapy
- Given a patient case, determine an appropriate treatment recommendation.

John Marshall, PharmD, BCPS

Clinical Pharmacy Coordinator – Critical Care –
Beth Israel Deaconess Medical Center
Adjunct Assistant Clinical Professor, Northeastern
University

Chronic Management of Opioid Addiction: Advances
in Therapy

- List therapies commonly utilized for the long-term management of opioid addiction
- Compare and contrast buprenorphine vs. methadone for the chronic management of opioid addiction
- Summarize the clinical benefits of buprenorphine for addiction maintenance
- Counsel patients and/or caregivers on the proper use of buprenorphine including administration, side effect management, and expectations of therapy
