**Learning Objectives**

At the end of this program participants should be able to:

**Improving Patient Adherence to Asthma Medications: Practical Considerations for Pharmacists**

- Describe the incidence and effect of asthma on the health of Americans
- Discuss the obstacles and impact of adherence in patients with asthma
- Utilize tools to identify and assist non-adherent patients achieve better health outcomes
- Examine the use of motivational interviewing techniques to help patients improve asthma control

**Type 2 Diabetes: Past, Present and Future**

- Describe the pathophysiology of type 2 diabetes (DM)
- Describe evidence based goals as related to DM
- Compare and contrast the medications used to DM
- Develop an evidence based treatment plan for the treatment of DM
- Discuss the DM treatments that are in the pipeline

**Pharmacy Law Update: The Impact of Regulatory Law and Case Law on Pharmacy Practice**

- Examine the role of the Corresponding Responsibility Doctrine on modern pharmacy practice and compare your practices with those of your colleagues.
- Analyze the Klasch decision and attempt to predict its likely impact, in certain settings, in expanding a Pharmacist's Duty to Warn.
- Discuss recent developments in Risk Evaluation and Mitigation Strategies (REMS).
- Identify, through hypotheticals and case law, how a pharmacist could be held liable for damages by ignoring the requirements of a State Prescription Monitoring Program (PMP).
